

Description : Baby Songs II

Platform : iOS / Android

Baby Songs II is your ultimate baby bedtime companion! Let your baby enjoy a full night's sleep with this magical app that will automatically play soothing lullabies & melodies as soon as it detects ambient sounds and slowly fade out until your baby falls sound asleep.

How does it work?

By activating the Sound Sensor, as soon as your baby cries, yells or gets upset, the app will detect the ambient sounds and immediately start playing the lullabies of your choice. The playback will slowly fade out until no more sound is detected and baby is back to sleep

Featuring a continuously updated library of soothing melodies and traditional lullabies, the app allows you to choose from a wide variety of different tracks to accompany your baby to sleep.

If you just can't find what you're looking or want to customize your **Baby Songs II** experience even more, tap on the Custom tab to create a recording of your own or import music directly from your iPhone / iPad's library.

The possibilities are endless! Create your very own lullaby or record a message with your own voice to soothe your baby while you're away.

Caution: Please remember to turn your iPhone on Airplane Mode to prevent it from ringing and emitting waves. It is not recommended to leave your iPhone or iPad in your baby's bed at night, it is safer to put it on a table nearby
