

Descriptifon Baby songs :

Version 2.2.4

Plateform : iOS

Baby Songs is a free app which lets you play lullabies and soothing melodies to your little ones, helping them fall sound asleep. Designed for babies & loved by parents all over the world.

*****NEW: Video Playback!*****

Now not only can you play melodies to your babies & toddlers, you can also let them watch children's videos and character animations. They will love it!

FEATURES:

*****EXTENSIVE LULLABIES LIBRARY with All Time Classics, BUNDLE & RANDOM MODE*****

*****AUTO MODE*****

As soon as baby cries, screams, yells or get upset, the application detects the ambient sounds and automatically plays the songs you would have previously selected until baby goes back to sleep.

*****CUSTOM RECORDING*****

Record your own voice and create your very own lullaby! This way baby can hear your comforting voice speaking tenderly or singing his/her favorite melody even when you're not around.

CAUTION: Do not forget to activate the flight mode to prevent your phone from ringing and emitting waves. It is not recommended to leave your phone in your baby's bed. It's best to place the phone on a table nearby, in order to keep a safe distance from your infant.
